ok

ok

incorrect formatting

“...View your history and find the first command used to complete this assignment. Note the line number. Save the history from, and including, the line you just identified to the end of your history in a file called **logOne** in the **archive** directory....”

contains all (or unrelated) history, did not use **head/tail to isolate only the section required** - fails to demonstrate understanding of the commands and concepts

```

“...the definition list, with a single-line entry for each command you encountered in Worksheets 1, 2, 3, 4, Modules 1, 2, 3, 4, and this assignment.”

there are 50 different commands in Modules 1 to 4 -

M1 13 ssh login bash sh csh tcsh ksh logout exit su sudo passwd man

M2 12 man stty history date who cal cat clear wc grep mesg write

M3 7 pwd cd ls mkdir rmdir rm ln

M4 18 chmod ls cp rm mv find locate more less head tail touch sort cut paste diff comm vi

- For any command that does not have an entry when using `what is` command, create your own entry, using the same format (you can omit the brackets containing the manual page level or using 0 to indicate that it does not come from the online manual).

```
